

Dead Rabbits Theatre

Presents

Technical Rider

My Love Lies Frozen in the Ice

Show info

The show is 70 min long (no interval).

4 actors in the cast

Tours with 1 or 2 technicians

We have a PA system (sound and lights) if needed.

Stage

The show is performed end-on

Minimum stage dimensions 4.5 metres x 4.5 metres (but plays very well in bigger venues too)

A parachute is suspended from 3 points to the rig (around 5.5 metres from the Downstage edge). If your lx bars are fixed, this could be the same as a lighting bar. If your LX bars are suspended, it would be useful if this was upstage of a lighting bar

We tour:

3 x 20kg Bags. (Of costume and props)

3 x 6ft ladders

1 x 4ft ladders

Lighting

Cool General Cover.

Strong Blue Wash.

Greens, Pinks and Reds useful.

The ability to focus 5 specials.

We tour one LX fixture to create "Northern Lights"

Support focussing and fitting up parachute useful, although the company is pretty self-contained.

If intelligent lighting, please support out Tech ASM to programme.

We prefer to 'live mix' lx states using sub masters (We know this is odd but it changes the quality of the light changes)

Sound

We require a mini jack to plug into our own Mac.

Dressing

Please provide at least 1 dressing room suitable for 4 people.
