

The Giant Balloon Show (Indoor) Technical information

Performance Information / How It Works

A 45 minute show featuring clowning, audience interaction and lots of balloons.

The entire show is housed in the Balloon Cart, which will be onstage at all times. All props and balloons are held within the cart.

Get in: 1 hour, Get out: 30 mins

Performance space

Performance space required, 4m x 4m minimum (min ceiling height 3m but the higher the better)

This should be flat ground, free from rough surfaces which may burst the Giant Balloon.

This is a very interactive show and works best when performed as close to an audience as possible

Required

PA

DI box onstage for Mike to control his music from his iPod

Lighting- general wash, bright colours, snazzy lights for Giant Balloon finale appreciated if there is time.

Access

A parking space near to the performance is required for unloading the balloon cart.

The balloon cart is on wheels and needs access of at least 1m width – so no narrow spaces / bollards or steps between storage, unloading and performance area.

Approx size of balloon cart 1m wide x 1m20 deep x 1m high.

Dressing Room

A safe and secure dressing room is required with access to at least 2 plug sockets to charge equipment.

Secure Storage

A secure, ground floor space to store the Balloon Cart between performances is required.

Total number of performers and crew: 1
